

# What the tech? TAKEOVER

## COVID-19 has ushered in a new way of working for organisations

Change drives evolution, and many have taken positive steps for the evolution of the business and the good of their employees:

90% agree that their organisation will be significantly more robust having been through the COVID-19 crisis and come out the other side, with multiple benefits from the upheaval either seen or anticipated:

65% have seen that remote working at scale is possible due to the upheaval from COVID-19, and many rate their organisation's transition towards remote working in a positive light:

## COVID-19 was always going to be a challenge financially for organisations

Many have had to make financial adjustments:

## Cybersecurity is also an area where organisations have felt the strain from COVID-19

65% admit that while remote working is great, they are less secure as a business...

...while 41% confess that securing their remote workforce has been among the most significant challenges for their IT department

Indeed, 71% have experienced at least one security related issue since transitioning towards remote working at scale:

## COVID-19 has emphasised the value of the IT department to enterprise size organisations, but they've experienced some difficulties along the way

91% believe that the pressure on IT to "fix" remote working has significantly increased as a result of the COVID-19 crisis, while a number of challenges have arisen:

53% think that greater value will be placed on the IT team as a result of the upheaval from COVID-19, while organisations have already learnt plenty of lessons from this crisis, such as...
